

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

Claim 1 (canceled)

1 Claim 2 (currently amended): A computer implemented ~~[[S]]~~ security system for
2 commercial transactions via the Internet or other communications networks, whose purpose is
3 to enable any user or purchaser to avoid having to enter his bank information over the
4 network, comprising: using the user's telecommunication service provider or an intermediary
5 finance company as a bridge element between this user and the company supplying the
6 product or service in question, so that the user enters his personal information by filling in a
7 form; this information is compared with the data received from the telephone or finance
8 company, which has this information in possession, to accept the purchase if the data
9 coincides, or to reject the purchase if not, so that if the purchase is accepted, the purchase is
10 charged to the user's phone bill, while the supplier company will collect from the
11 aforementioned operator at a later date, wherein an application begins by asking the user to
12 select a language to be used, from a group of languages pre-set for that purpose, following
13 which the user is informed of the possibility of using the same remote purchase service by
14 means of a credit card accepted at authorized establishments; if the user does not choose to
15 pay with a card, information corresponding to the subscriber phone number from which the
16 call was made and to the subscriber himself is received from the telephone service provider or
17 finance company authorized to provide the service, for later verification, after which the user

18 must fill in a form requesting his personal information, as well as information about whether
19 he placed the call from his subscriber telephone number or from another number; in parallel,
20 an identifying password is requested, so that once all the information has been checked and
21 compared, with the possibility of correcting mistakes or canceling, the user goes on to a
22 consignee data form; in this form, the user reflects the information corresponding to the place
23 where the shipment is to be delivered, and this is followed by another form corresponding to
24 the information about this delivery in terms of lead time, time of day, day, month and year for
25 the delivery; next, communication is established with the supplier company, and the user's
26 encrypted data is sent and his purchase confirmed.

1 Claim 3 (currently amended): The computer implemented [[S]]security system for
2 commercial transactions via the Internet or other communications networks, according to
3 claim 2, wherein the user places the call from a number other than his own phone number, the
4 application, after checking to make sure that this subscriber number appears on the form,
5 establishes a pre-determined period, for example, 24 hours, to confirm the purchase from his
6 own phone number.

Claims 4-21 (canceled)
